## COA: P2.4B went to Tesda but jobs few

By David Sison/Inquirer

### But, the government

has not yet started a large-scale program to train workers for the construction industry, which is expected to be the main beneficiary of the COA funds.

The Commission on Audit (COA) has released a report on the use of the P2.4-billion COA funds for the construction industry. The report shows that the funds were mostly used for the construction of government buildings and infrastructure projects. However, the report also points out that the government has not yet started a large-scale program to train workers for the construction industry, which is expected to be the main beneficiary of the COA funds.

### Depositors endure long wait for money return

Depositors of the defunct Rizal Commercial Banking Corp. (RCBC) are still waiting for their money to be returned. The Philippine Deposit Insurance Corp. (PDIC) has been slow in processing the claims, and many depositors are frustrated. Some have been waiting for months, while others have been waiting for over a year. The PDIC has said that it is working to speed up the process, but depositors are still not satisfied.

### Depositors' labor group demands response for Marikina labor union

A labor group representing the workers of the defunct Rizal Commercial Banking Corp. (RCBC) has demanded a response from the Philippine Deposit Insurance Corp. (PDIC) regarding the labor union in Marikina. The labor group says that the PDIC has not yet provided any information about the status of the labor union, and they are concerned about the workers' rights. They are demanding that the PDIC provide a clear and timely response to their concerns.

Figure 1 displays four heatmaps arranged in a 2x2 grid, showing the relationship between the number of species (S) on the x-axis and the number of individuals (N) on the y-axis. The heatmaps represent different species richness estimators: Chao1 (top-left), Chao2 (top-right), ACE1 (bottom-left), and ACE2 (bottom-right). The color scale indicates the magnitude of the estimator, with darker colors representing higher values. The x-axis (S) ranges from 1 to 10, and the y-axis (N) ranges from 1 to 10. The heatmaps show that the estimators generally increase with both S and N, with Chao1 and Chao2 showing higher values than ACE1 and ACE2.

Manila, 11/11/00. The Philippines' performance at the SEA Games has been disappointing, with the country failing to win a gold medal in any of the events. The Philippines' performance has been a source of disappointment for the country's sports fans, who had hoped for a more successful performance. The Philippines' performance has been a result of a combination of factors, including a lack of preparation and a lack of experience. The Philippines' performance has been a wake-up call for the country's sports officials, who will need to work harder to improve the country's performance in future games. # Sportsman's life

Manila, 11/11/00. The life of a sportsman is a challenging one, with athletes facing a variety of difficulties. One of the most common difficulties is the lack of financial resources. Athletes often have to support themselves and their families on a very small income. Another difficulty is the lack of time. Athletes have to spend a lot of time training and competing, which leaves them with very little time for other activities. A third difficulty is the lack of support. Athletes often feel isolated and unsupported, which can lead to mental health problems. Despite these difficulties, many athletes persevere and achieve great success. The life of a sportsman is a difficult one, but it is also a rewarding one. Athletes who persevere and achieve success can inspire others and make a positive impact on the world.

## What is the real message of the Virgin to Emma de Guzman?

The Virgin by Emma de Guzman

**W**hen I first read the book, I was struck by the author's use of language. The book is a collection of short stories, and the author's style is very poetic and evocative. The stories are set in a world that is both familiar and strange, and the author's use of language is a key element of the book's appeal.
